Ventilation system and its types

Clean and fresh air is the pledge of health. Desirable that it surrounds a person not only at home but in the city of El-Dorado, but also at home or at work. With this in mind, Ventilation Company offers ventilation systems in varieties there are several characteristics. Ventilation Equipment Manufacturers. The main can be considered the principle of functioning. It can be of two types: supply and exhaust. Supply is the air from the ventilation system provides an influx of fresh and purified air from the street, which removes polluted from the room through door and window openings. The principle of operation of the exhaust system is familiar to many on the example of home exhaust systems, without which an apartment in El-Dorado cannot do. Exhaust air is the air that is contaminated by cooking, and how to make ventilation in the house. With its help, polluted air is removed from the room, passing stipulated degree of purification. However, the most high-quality type of ventilation is combined, which combines the supply and exhaust systems. Thanks to it, the processes of outflow of polluted and influx of fresh air are combined.
